

Overview

The Workato platform provides a comprehensive suite of tools to manage a variety of tasks and workflows. As a highly utilized automation platform, Workato comprises numerous components that cater to diverse user needs.

An integral part of the platform is the Message Templates, of which there are eight. For group management, there are a total of seven on-prem groups, out of which three are active and four are inactive.

A brief overview of the platform usage reveals that 318 out of 300 available recipes are being used, and 14.7 million tasks out of 600 million are being utilized. The platform's renewal is set for December 31, 2024.

The Connector SDK of the platform consists of three types, namely the Concur V4 SDK, the GitLab SDK, and the Google Cloud SDK. The platform also supports two custom OAuth profiles, the ATS Bot and the SmartWork Bot.

Environment properties are also a part of the platform, totalling five properties. The platform also offers file storage capability for software installation.

There are six Lookup Tables and six Common Data Models that aid in data management and organization. The platform also has a data retention period of 90 days.

The Workato platform hosts numerous recipes, 1294 in total, out of which 944 are active, and 350 are inactive. It also facilitates connections, totalling 176, out of which 175 are connected, and one is disconnected.

The platform has an AI component, with Copilot and AI by Workato app being enabled. It also lists multiple apps like Amazon S3, Azure Active Directory, Concur, and others, making it versatile and adaptable.

Finally, the top 10 recipes sorted by tasks used indicate the most utilized workflows on the platform. The platform's task consumption for the past 30 days shows that a total of 808 recipes have been utilized, resulting in 3.2 million successful jobs and 2.1 thousand failed jobs.

Features and Services

The Workato platform provides a variety of features and services that allow for efficient and effective workflow management.

Message Templates

There are a total of eight message templates available to users. These include, but are not limited to, MessageTemplate_1 through MessageTemplate_8.

On-Prem Groups

On the platform, users have access to seven On-Prem groups, three of which are active while four remain inactive.

Plan Usage

The Workato platform allows for a maximum of 300 recipes, of which 318 are currently in use. Moreover, 14.7 million of the 600 million tasks available have been utilized. The next renewal is scheduled for December 31, 2024.

Connector SDK

There are three Connector Software Development Kits (SDKs) available: the Concur V4 SDK, GitLab SDK, and Google Cloud SDK.

Custom OAuth Profiles

The platform has two Custom OAuth profiles: ATS Bot and SmartWork Bot.

Environment Properties

Five environment properties are listed on the platform.

File Storage

Workato also provides file storage solutions, such as 'install_software'.

Lookup Tables

Workato platform users have access to six lookup tables.

Workato Recipe

The platform currently hosts a total of 1,294 recipes, 944 of which are active and 350 inactive. Connections total to 176, with 175 being connected and one disconnected.

Common Data Models

Workato offers six common data models.

Task Consumption

Over the past 30 days, the total recipe count stood at 808, with 3.2 million successful jobs and 2.1 thousand failed jobs. Tasks used totalled 39.7 million.

Data Retention

The platform's data retention period is 90 days.

AI Features

The Workato platform utilizes Artificial Intelligence (AI) features, such as the enabled Copilot and the AI by Workato app.

Applications

Several applications are compatible with the Workato platform, including Amazon S3, Azure Active Directory, Concur, Confluence, CyberArk, Gmail, Google Calendar, Google Drive, Google Sheets, SQL Server, Zoom, Salesforce, Oracle Fusion Cloud, SFTP, Workday, and Zendesk.
